THE BETTER CHOICE. SINCE 1948.
German quality sprayers and cut-off machines

PLANT PROTECTION AND LANDSCAPE MANAGEMENT
Sprayers. Misters. Blowers. Granulate spreaders.

SOLO – pioneers of mobile plant protection technology

The tradition of protecting and caring for plants and plantations goes right back to the early days of the company itself. It was founded 70 years ago in 1948, in the wine producing area around Stuttgart. The plant protection sector soon became one of the applications for the small and lightweight two-stroke engine. At the time, the fledgling business still traded under the name "Kleinmotoren GmbH".

Vineyard owners in and around Stuttgart were justifiably impressed by how much easier their work became as a result of this new generation of appliances. This innovation finally made it possible for someone to work on their own, that is to say "solo". It also explains how the current brand name came into being in the early days of this family-run business. Today, the company is run by the second generation of the same family.

All that followed is closely linked to the name SOLO: mobile plant protection technology that enjoys the best of reputations – all around the world, be it in German gardens, the vineyards of France, cocoa plantations in Africa, cotton fields in Asia and coffee plantations in South America. SOLO appliances are also used to disinfect larger buildings.

In order to meet these diverse requirements, the range of plant protection appliances from SOLO provides everything you might need – from small, manually operated, 1 litre sprayers to highly capable backpack misters with large tank and powerful two-stroke engines. An extensive range of accessories rounds off our plant protection appliances.

Four tips to help you choose the right product

1

Pressure sprayer or backpack sprayer?

The answer to this question often depends on the size of the area to be treated. If it's on the small side, a pressure sprayer with shoulder strap will suffice. For larger areas, backpack sprayers are more suitable as they are comfortable to carry and have a larger capacity. All that is left to decide is whether you want to operate the pump manually or let a battery or petrol driven unit do the work for you.

2

Tall plants?

If you need to treat tall plants, you should use extension wands. They will help you reach the right places and apply the medium more accurately. As well as being made of plastic material, spray wands are also available in robust brass or even ultra-light carbon. The telescopic carbon spray wand, which can be extended up to 230 cm, weighs just 160 g. This protects the joints even during longer working periods.

3

Liquid or solid?

All SOLO sprayers are designed for applying liquid media. However, the nozzles vary depending on the application: flat spray nozzles for ground spraying, hollow cone nozzles for individual plants, insecticides and fungicides. Herbicides are best applied with deflector nozzles. With solid granulate, SOLO 421 is the product of choice. It distributes the medium evenly over the required area – and can also be used in winter to apply gritting salt to pathways.

4

When to use a mister rather than a sprayer?

In large scale agricultural plantings, orchards, horticulture, vineyards and in many other cultivated plant stocks around the world, it is crucial for the media to successfully reach and penetrate the crops. SOLO power misters are designed to accomplish precisely this. They generate a powerful air flow which splits the plant protection medium into fine mist to cover all the required parts of the plant effectively.

Classic, Comfort or Pro...

SOLO CLASSIC

SOLO COMFORT

SOLO PRO

Whether you're an occasional user, a discerning private user or a professional, you're guaranteed to find the right product to suit your requirements in one of our three equipment lines.

It goes without saying that even our CLASSIC sprayers are of the same high quality you would expect from all SOLO products. The differences are found in the equipment features and ease of use. For example, all sprayers in the COMFORT series and above are fitted as standard with FKM seals ("Viton®") in all the important places. Moreover, the PRO backpack sprayers feature a lightweight, telescopic spray wand and are especially comfortable to wear, preventing tiredness even after prolonged periods of use.

The two battery-operated sprayers, two power sprayers and two power misters are not only lightweight but also offer a powerful output. Whether they use electric motors, 2-stroke SOLO engines or 4-stroke Honda engines, these tools combine high levels of performance and top quality.

In addition to sprayers and misters, the PRO series also features the 421 granulate spreader and the 467 backpack blower.

MANUAL SPRAYERS

Manual sprayers are an inexpensive and indispensable aid for a variety of applications around the home. Plants on balconies and patios, and of course decorative indoor plants too, are easy to look after with these compact devices. Robust pumps reach the required operating pressure after just a few strokes. Once the pressure is reached, you can apply almost the entire content without additional pumping. The integral safety valve protects the appliance against excess pressure build-up.

The high quality hollow cone nozzle is fully adjustable – from a direct jet to the finest mist. The robust containers have a large filling aperture to prevent spills when being filled and emptied, and their stable base stops them overturning when full. The underside of leaves can be optimally treated with the 401 and 402 models: the pivoting nozzle and small drift guard ensure the spray medium is only applied where actually needed.

MANUAL SPRAYERS

- | | | | | | |
|----|------------------------|----|--|----|--|
| 01 | Sturdy pump lever | 05 | Ergonomic robust handle that can also be gripped with gloves | 09 | Stainless steel spray wand with adjustable, 180° pivoting universal nozzle and drift guard |

MANUAL SPRAYERS

SOLO 403

Inexpensive manual pressure sprayer with nominal capacity of 1.25 l. For plant protection and care inside the house, on patios, balconies or in conservatories. 1.25 l, 2 bar, 0.5 kg
Part no. 40301

SOLO 404

As per SOLO 403, but with nominal capacity of 2 l. 2.0 l, 2 bar, 0.6 kg
Part no. 40401

SOLO 401

Robust manual pressure sprayer for semi-professional activities. Equipped with high quality FKM seals ("Viton®"). The pivoting universal nozzle enables an even greater application range. 1 l, 2.5 bar, 0.4 kg
Part no. 40101

SOLO 402

As per SOLO 401, but with nominal capacity of 2 l. 2 l, 2.5 bar, 0.5 kg
Part no. 40201

Greater reach:

For the two manual sprayers in the Comfort line, SOLO 401 and 402, a practical accessory is available in the form of a telescopic wand (49628), which can be extended from 25 to 50 cm as required. The telescopic function improves access to parts of plants that are further away or hard to reach. For example, the nozzle head can be pivoted through 180°, making it convenient and effective to treat the underside of affected leaves.

PRESSURE SPRAYERS

SOLO pressure sprayers with shoulder strap have long been popular and reliable aids in private gardens or for countryside management. They do not take up much storage space and are ready for immediate use whenever required. Various tank volumes are available, depending on the size of the garden. The 5 litre model is the most popular for garden applications. For larger areas, 7 to 9 litres may be preferable. The intensity of use also plays an important role, of course. Occasional users have the choice between the 408 and 409 entry level models, and the 461 or 462 all-rounders from the Comfort line. Use the convenient mobile 453 trolley sprayer to cover longer distances with ease between spray locations.

If the terrain is fairly rugged and the application of a more professional nature, such as in horticulture and landscaping, or in agriculture and forestry, we recommend the 456, 457 or 458 professional pressure sprayers. With a wall thickness of 7 mm, their tanks are some of the most robust on the market. Even an accidental tumble from their storage area or similar tough tests are no problem for these professional pressure sprayers.

With resistance to UV rays, the transparent tanks are all set for a long service life. Comprehensive accessories, such as extension wands, drift guards and different nozzles for a variety of applications make the SOLO pressure sprayers even more versatile to use.

PRESSURE SPRAYERS

- 01 High quality nozzles (408/409 adjustable universal nozzle)
- 02 Flexible spray wand for the toughest mechanical applications
- 03 Spray wand retainer; two clips for the 456-458: for plastic and brass spray wands

- 04 Removable top section with large aperture to facilitate filling, draining and cleaning
- 05 Safety valve automatically compensates in the case of excess pressure inside the tank
- 06 Long, broad, practical strap

- 07 Extra large piston pump – operating pressure achieved after just a few pump strokes
- 08 Stable reinforced hose with ergonomic handle
- 09 Transparent pressure sprayer tank for good visibility of the spray medium level, made from polyethylene with UV resistance

PRESSURE SPRAYERS

SOLO 408

Entry level model with lightweight, 5 l tank, 40 cm plastic wand and adjustable universal nozzle. Suitable for occasional use in small private gardens.

Piston pump, 5 l, 1.2 kg
Part no. 40801

SOLO 409

As per SOLO 408, but with nominal capacity of 7 l.

Piston pump, 7 l, 1.4 kg
Part no. 40901

SOLO 453

Plant maintenance made easy: the large wheels of the SOLO 453 trolley sprayer make it easy to pull along, facilitating work involving long distances, whether moving through a garden or transporting to site. Yet the use of aluminium for the robust handle keeps the weight right down. The dry weight is a mere 3.5 kg. Just a few pump strokes are enough to build the necessary pressure inside the 11 litre tank. The pump handle is large and robust enough to be securely gripped with gloves. The same applies to the tank handle with its soft grip sleeve. A 2.5 m spiral hose provides the necessary reach.

Piston pump, 11 l, 3.5 kg
Part no. 45301

SOLO 461

An indispensable aid in many private gardens for plant protection, treating weeds and applying insecticide.

Stable 5 litre tank, 50 cm spray wand and SOLO flat spray and hollow cone nozzle.

Piston pump, 5 l, 1.5 kg
Part no. 46101

Practical compartment to store nozzles

SOLO 462

As per SOLO 461, but with nominal capacity of 7 l.

Piston pump, 7 l, 1.7 kg
Part no. 46290

SOLO 456

The cream of the crop amongst pressure sprayers, with top performance even in tough, continuous use.

Extremely stable 5 litre tank, unbreakable 50 cm plastic wand and SOLO flat spray and hollow cone nozzle.

Piston pump, 5 l, 2.6 kg
Part no. 45601

SOLO 457

As per SOLO 456, but with nominal capacity of 7 l.

Piston pump, 7 l, 2.8 kg
Part no. 45701

SOLO 458

As per SOLO 456, but with nominal capacity of 9 l.

Piston pump, 9 l, 3.0 kg
Part no. 45801

BACKPACK SPRAYERS

When it comes to plastic backpack sprayers, we have decades of experience, having started producing full plastic sprayers back in 1960.

The lightness of the material on the one hand and its durability on the other are just two good reasons to choose SOLO backpack sprayers.

Starting with the Comfort models, the backpack sprayers are also equipped with highly resistant FKM seals ("Viton®") for applying aggressive liquids. There are four pressure settings so you can apply precise quantities.

With abrasive fluids, the 473D and 475 sprayer models with diaphragm pump are the ideal choice, as the special Tivilon diaphragm in their pumps is highly robust. With either piston or diaphragm, the pumps in the SOLO backpack sprayers are

some of the most effortless and efficient on the market. Longer operating times are therefore simple to achieve, thanks also to the exceptional straps, inspired by the outdoor sports sector on the 425 PRO models. Comfortable and padded, they can be adjusted in various ways for a perfect fit – also available as accessories.

The UV-resistant tanks come in three sizes: 10, 15 or 20 litres. They are translucent so the fill level is easily visible. The tank is filled and drained through a large filler neck. For convenient transport, the Comfort and Pro models with 15 litre tank feature a carrying handle with built-in spray wand retainer.

See page 32 onwards for our extensive range of accessories. These can be used to further extend the usage options of these highly resilient sprayers.

BACKPACK SPRAYERS

- 01 Impressive spray performance, two nozzles as standard
- 02 Ergonomically refined, rotating, length-adjustable pump lever (Comfort/Pro), individual pump lever mounting for right/left-handed users
- 03 Wide, comfortably padded straps with strain relief; Pro models with special backpack carrying system
- 04 Large filling and cleaning aperture
- 05 Carrying handle with spray wand retainer (Comfort/Pro)
- 06 Ergonomic tank design:
 - high quality plastic resistant to UV rays
 - non-pressurised tank with separate air chamber
 - fill level markings
 - low inherent weight
 - clearly visible spray medium level
- 07 Resistant FKM seals ("Viton®") for all approved spray liquids (Comfort/Pro)
- 08 High grip manual valve with pressure gauge connection for precisely metered spray volume
- 09 Long reinforced hose for extended reach
- 10 Effective, smooth-running pump 4 manual spray pressure settings (Comfort/Pro)
- 11 Stable tank frame

BACKPACK SPRAYERS

SOLO 425 CLASSIC

A true all-rounder, proven millions of times over, for plant protection applications. Simple, easy to service and robust design. Pump lever can be fitted on the right or left side.
Piston pump, 15 l, 4.4 kg
Part no. 42521

SOLO 435 CLASSIC

Identical to 425 CLASSIC, but with nominal capacity of 20 l.
Piston pump, 20 l, 5.0 kg
Part no. 43521

NEW

SOLO 473D CLASSIC

Sprayer with nominal capacity of 10 l and diaphragm pump for applying abrasive fluids. Pump lever can be fitted on the right or left side.
Diaphragm pump, 10 l, 4.2 kg
Part no. 47321

SOLO 475 CLASSIC

A classic with a nominal capacity of 15 l and diaphragm pump. For abrasive fluids.
Diaphragm pump, 15 l, 4.6 kg
Part no. 47521

SOLO 425 COMFORT

Better equipped for greater comfort: fully adjustable pump lever for ergonomic operation and practical carrying handle with integral spray wand retainer. In addition, the pressure can be switched to one of four settings.
Piston pump, 15 l, 4.5 kg
Part no. 42531

SOLO 435 COMFORT

As per 425 COMFORT, but with nominal capacity of 20 l and no carrying handle.
Piston pump, 20 l, 5.1 kg
Part no. 43531

SOLO 475 COMFORT

The diaphragm pump model is generally used in conjunction with relatively viscous herbicides in the low pressure range.
Diaphragm pump, 15 l, 4.7 kg
Part no. 47531

SOLO 425 PRO

The ultimate backpack sprayer. Professional carrying system, telescopic spray wand with high quality brass nozzles and pressure gauge are standard features with this model.
Piston pump, 15 l, 5.2 kg
Part no. 42541

Backpack sprayers don't come better than this
The SOLO 425 PRO professional model, with its premium features, is designed specifically for professional users. Those who work long hours with a backpack sprayer on a daily basis will appreciate the comfortable and fully adjustable backpack carrying system, inspired by the outdoor sports sector, which has been optimised for maximum user comfort. The spray wand and nozzles of this sprayer also meet the needs of professionals: the lightweight plastic wand can be adjusted between 50 cm and 90 cm. The standard delivery includes high quality brass nozzles: flat spray and hollow cone (adjustable)

BATTERY-OPERATED SPRAYERS

The 416 Li and 417 battery-operated sprayers from SOLO are whisper-quiet and free of emissions. With their powerful electric drives, they are the ideal choice when it comes to plant protection in enclosed spaces with large areas requiring treatment. Efficient working practices and high performance are called for in conservatories and greenhouses, too. Of course, these two battery-operated sprayers also perform well outdoors. With one press of the Power button, the powerful pump is barely noticeable but for a quiet humming sound. Even at the second power setting, the sound emissions are hardly any more audible.

This ensures a pleasant working environment without the need for ear protectors.

These two power settings regulate the pressure range of the powerful 12 V pumps to up to 4.3 bar. When the battery runs out, it can be quickly recharged inside the appliance.

Compared to the lead gel battery in the 417, the 416 Li has a lithium-ion battery, and a capacity of 20 rather than 18 litres. Last but not least, the sprayers include a lightweight, 50 to 90 cm telescopic wand made from carbon.

BATTERY-OPERATED SPRAYERS

- 01 1.5 m long reinforced hose
- 02 Robust manual valve with vibration-dampened pressure gauge
- 03 Seals resistant to all approved spray liquids
- 04 Large filling and cleaning aperture (with quick-action closure on the 416 Li)
- 05 Integrated tank fill level scale
- 06 Ergonomically shaped tank made from UV-resistant plastic with comfortable padded backpack frame, wide shoulder straps and waist strap (416 Li)
- 07 Almost unbreakable plastic spray wand (417) or carbon telescopic spray wand (416 Li)
- 08 Robust electric pump in impact-resistant enclosure; two settings for pressure and spray volume
- 09 Flat spray nozzle 03-F80, ISO standard compliant (with ball valve filter for the 416 Li)
- 10 Powerful, maintenance-free battery
416 Li model: lithium-ion battery

BATTERY-OPERATED SPRAYERS

SOLO 417

The entry level model for battery-operated plant protection sprayers is the SOLO 417. The powerful lead gel battery provides up to 3.7 hours of operation and is recharged after 8 hours. The lightweight, transparent plastic tank can hold 18 l. A 50 cm plastic spray wand with high quality nozzle and pressure gauge are included as standard.

Lead gel battery
12 V/7.2 Ah, 18 l, 7.6 kg
Part no. 41701

SOLO 416 Li

For professional use in commercial nurseries and greenhouses, or for everyday horticulture and landscaping tasks. The powerful lithium-ion battery ensures 5.9 hours of continuous operation and recharges in just 5.5 hours.

Additional features of the 416 Li:
+ Heavy duty lithium-ion battery with up to 5.9 h runtime
+ Large tank lid with quick-acting closure
+ Removable stainless steel filling strainer
+ 50-90 cm telescopic carbon spray wand
+ Space saving vertical spray wand retainer
+ Low inherent weight
Lithium-ion battery 11.1 V/7.8 Ah, 20 l, 5.2 kg
Part no. 41601

Expand your options – with matching accessories from SOLO

Reach tall plants with ease using a longer spray wand – available in plastic, brass or even ultra-lightweight carbon versions. The latter has a reach of up to 230 cm. Choosing the right nozzle is also important. The flat spray nozzle is the first choice for treating large areas, whereas herbicide can be applied with pinpoint accuracy using deflector or full cone nozzles, plus drift guards to prevent the media drifting into adjacent areas. Detailed descriptions of SOLO's comprehensive range of accessories can be found from page 32 onwards.

POWER SPRAYERS

Our power sprayers are characterised by their high efficiency over larger areas. This combination is applicable for very tall plantings such as trees and large shrubs, areas containing crops, or in professional horticulture and landscaping. For the SOLO 433, the necessary power is delivered by a 4-stroke HONDA engine; for the SOLO 434 by a 2-stroke SOLO engine. Both have special bearings to protect them from vibrations, are easy to start and simple to service. The adjustable operating pressure of the push-pull piston pump reaches up to 30 bar, generating the necessary distribution distance. Long working stretches without refilling are ensured by nominal capacities of 18 or 20 litres.

A practical drain connector underneath the tank enables complete draining of any leftover liquid. Both models are equipped with a 50 cm stainless steel spray wand and a pressure gauge on the sturdy handle, which allows the pressure to be adjusted for any application. Supplied with a high quality twin nozzle, with stainless steel nozzle discs. With the right accessories (see page 37), you can discover the versatility and all the advantages of these power pressure sprayers. For example, increase the reach with the right spray wand. Or adjust the spray pattern with the universal spray wand.

POWER SPRAYERS

- 01 Twin nozzle
- 02 50 cm stainless steel spray wand
- 03 Large filling and cleaning aperture
- 04 Spray wand retainer
- 05 Ergonomically designed tank made from translucent, UV-resistant plastic with comfortable, padded backpack frame and wide shoulder straps
- 06 Robust manual valve with silicone-dampened pressure gauge
- 07 Powerful 2-stroke SOLO engine (434) or 4-stroke Honda engine (433)
- 08 Anti-vibration dampers
- 09 Long high pressure hose for stress-free arm movements

POWER SPRAYERS

SOLO 434

The small, compact **2-stroke SOLO engine** is lightweight and quiet in operation. The push-pull piston pump that it drives generates a pressure of up to 20 bar. This means that 1.9 l per minute can be applied with the standard nozzle. The 50 cm long, stainless steel spray wand is durable and suitable for all plant protection spray media. The standard twin nozzle offers versatile adjustment options for flexible applications.

2-stroke SOLO engine, 28.9 cm³, stainless steel spray wand, twin nozzle and pressure gauge
18 l, 9.3 kg
Part no. 43401

With 25 litre tank
Part no. 43402
(not available in the EU)

SOLO 433

The push-pull piston pump in the SOLO 433, driven by a **25 cm³ 4-stroke HONDA engine**, generates up to 30 bar pressure. In this high pressure range, the standard nozzle can deliver up to 2.4 l/min – and thanks to the high pressure, the spray medium can also reach considerable heights. The pressure can be checked on the clearly visible pressure gauge at any time.

Additional features of the 433:

- + Up to 30 bar pressure
- + Large tank lid and extremely wide filling aperture (14.5 cm!)
- + Removable stainless steel filling strainer
- + Space saving vertical spray wand retainer
- + Robust, 1.5 m long high pressure hose
- + High quality, fully adjustable carrying system

4-stroke HONDA engine, 25 cm³
Stainless steel spray wand, twin nozzle and pressure gauge
20 l, 9.8 kg
Part no. 43303

Variable spray pattern with the universal spray wand

A broader spray angle with small droplets, or concentrated with a longer distribution distance: you will need one or the other – or a stage somewhere in between – depending on the application area. No problem with the universal spray wand, available as an accessory. The nozzle can be infinitely adjusted with pinpoint accuracy. The standard delivery includes two different diameters, allowing you to work even more precisely and apply the spray media more accurately.

MISTERS

SOLO misters are amongst the most popular in the world. They are right at home and have become indispensable in agriculture, horticulture, woodland maintenance, public parks and green areas, amongst fruit and vine growers and in coffee and cocoa plantations in Africa and South America. This success does not come out of the blue:

Firstly, misters from SOLO have an impressive spraying capacity as well as being light. These characteristics make them the environmentally responsible choice for the economical protection of all crops and plantings anywhere in the world. Secondly, SOLO misters are remarkably robust and easy to handle. Thanks to all these benefits, they have been helping to bring about high yields around the globe for many years. In this, advanced engine technology

from SOLO ensures low fuel consumption, reduced exhaust gas emissions and high performance in continuous use – even when it gets very hot.

In addition to plant protection, these sprayers can also be used for disinfection and parasite control in the fields of logistics, agriculture and animal husbandry.

The range of accessories (see page 38) makes both SOLO misters, i.e. the 451 and the PORT 423, even more versatile. For example, a dusting attachment turns the PORT 423 into a brilliant dusting machine. If you need to increase the reach of SOLO misters (for example when spraying upwards), simply equip them with a liquid booster pump. This enables the use of longer spray wands, whilst keeping the spray pattern and spray volume constant.

MISTERS

- 01 Large filling and cleaning aperture; with quick-action closure on the 451
- 02 Extended reach through high air expulsion velocity
- 03 Large tank made from UV-resistant plastic. Fill level always readable through translucent tank wall
- 04 Ergonomically designed control for throttle, spray volume and start/stop
- 05 Large petrol tank together with a frugal 2-stroke SOLO engine ensure long working cycles
- 06 Comfortable, ergonomically shaped backpack frame with padded straps and anti-vibration dampers
- 07 Designed for easy maintenance
- 08 Fan housing made from highly resilient plastic
- 09 Long rotating plastic spray wand, can be pivoted effortlessly in any direction
- 10 Advanced, low-emission two-stroke SOLO engine with specially coated cylinder for a long service life of the appliances

MISTERS

SOLO 451-01

Powerful mister with quiet 66.5 cm³ 2-stroke SOLO engine. Advanced engine technology ensures low noise and exhaust gas emissions.

A diaphragm carburettor, decompression valve and comfortable backpack carrying system ensure you can work in comfort at all times.

66.5 cm³, 2.1 kW/2.9 hp, 1400 m³/h, 12 l, 11.8 kg
Part no. 45101

SOLO 451-02

As per 451-01, but with a tank capacity of 20 l – for even longer operating times.

66.5 cm³, 2.1 kW/2.9 HP, 1400 m³/h, 20 l, 12 kg
Part no. 45102

SOLO PORT 423

Throughout the world, the SOLO PORT 423 is the epitome of a robust and reliable mister. The powerful 72.3 cm³ 2-stroke SOLO engine delivers 3 kW. This durable mister has proven easy to service over many years.

72.3 cm³, 3.0 kW/4.1 HP, 1400 m³/h, 10 l, 11 kg
Part no. 42311 • 42313 (EU version)

The right nozzle for any crop:

The standard delivery of the SOLO 451 and PORT 423 includes a long reach nozzle as well as a wide spray grille and a nozzle with interchangeable deflectors. The long reach nozzle directs the spray medium over a distance of up to 12 metres (PORT 423). The spray width increases with the wide spray grille. The nozzle with single sided deflector makes it easier to spray rows of crops and also enables you to reach underneath leaves. The double sided deflector allows you to efficiently treat two rows at a time.

Mistblower

GRANULATE SPREADERS

SOLO 421

Seeds, fertiliser, e.g. after scarifying, gritting salt, oil absorbers, cleaning agents, pelletised lime, bird seed, stock feed, sand ... The SOLO granulate spreader 421 is designed to be used all year round.

A manual crank drives the rotating spreader disc to guarantee precise distribution of the granulate onto the area to be treated. The integral agitator ensures that the material in the tank is mixed thoroughly. Up to 9 litres of granulated matter can be applied where specifically required, even on difficult terrain – for example where a wheeled appliance would be unsuitable. The direction in which the material is spread can be adjusted just as easily as the delivery rate. The spreader is carried in front of the body by means of an adjustable strap. The large filling aperture makes filling easy, whilst the large screw top protects users from harmful dust.

- 01 Large filling and cleaning aperture with tightly fitting dust cap – prevents the ingress of dust
- 02 Padded shoulder strap
- 03 Large 9 litre tank
- 04 Smooth-running manual crank drive
- 05 Robust integral agitator: hermetically sealed, gearbox with angular metal gears
- 06 Spreader disc with large fins for even application

Also suitable for winter grit (salt etc.)

9 l, 2.5 kg • Part no. 42101

Adjustable distribution direction (1), agitator (2)

Enclosed worm drive with angular metal gears

Comfortable strap

Secure base and ergonomic moulding

BLOWER

SOLO 467

- 01 Comfortable carrying handle
- 02 Clean combustion engine with aluminium crankcase
- 03 Large starter handle
- 04 Single hand, multifunctional operating handle

- 05 Fuel tank made from transparent, stable plastic, making the fill level easily visible
- 06 Stable base
- 07 Anti-vibration system effectively reduces vibrations at body contact points
Padded back support

Maximum performance, optimum reliability and improved environmental characteristics were key factors in the development of the SOLO blower.

High blower output combined with consideration for the environment and immediate surroundings define the SOLO 467. Its comfortable backpack carrying system meets the requirements of professionals. Engine noise is reduced by a special silencer.

66.5 cm³, 2.1 kW/2.9 HP, 1400 m³/h, 10 kg
Part no. 46701

Spray wands for pressure and backpack sprayers

●	Recommended		●	Suitable		●	Not recommended			-	Unsuitable / does not fit			
Pos.	Designation	Description and recommended application	Part no.		403 404	408 409 453	401 402	461 462	456 457 456 PRO 458	425 435	473 D 475	416 Li 417		
1	Telescopic wand 25-50 cm	Telescopic spray wand, can be continuously extended to up to 50 cm, with adjustable universal nozzle and small drift guard. The telescopic function makes it easier to reach parts of plants that are further away or concealed. For example, the nozzle head can be pivoted through 180°, making it convenient and effective to treat the underside of affected leaves. The telescopic wand consists of a plastic, impact-resistant, profiled outer tube and a high grade, robust, stainless steel inner tube.	49628		-	-	●	-	-	-	-	-		
2	Spray wand 50 cm with flat spray nozzle	Standard spray wand 50 cm, including angled nozzle retainer, high grade flat spray nozzle, filter strainer and union nut for attachment to the manual valve. Spray wand is flexible and almost unbreakable thanks to high quality plastic that can withstand extreme loads. Suitable for universal use in many plant protection applications.	49439		-	●	-	●	●	●	●	●		
3	Extension wand 50 cm	We recommend the extension wand for all applications that simply require an extended reach. It includes a connection nut with seal ring for attachment to all SOLO standard spray wands, for pressure and backpack sprayers with a nominal capacity of 5 litres or more. Almost unbreakable thanks to high quality plastic that can withstand extreme loads.	49513		-	●	-	●	●	●	●	●		
4	Brass spray wand, 50 cm	Ideally suited to all intensive and professional applications that require robust, rigid spray wands. We also recommend it for working with SOLO accessories such as spray booms or drift guards. The 50 cm brass spray wand has a diameter of 8 mm and is supplied complete with union nut for attachment to the SOLO manual valve.	49519		-	●	-	●	●	●	●	●		
5	Universal spray wand, 50 cm NEW!	For all pressure and backpack sprayers from SOLO and many other manufacturers. Including adjustable universal nozzle and flat spray nozzle.	49610		-	●	-	●	●	●	●	-		
6	Brass spray wand, 75 cm	Ideally suited to all intensive and professional applications that require robust, rigid spray wands. The 75 cm long spray wand can be optimally supplemented with SOLO accessories such as drift guards.	49428		-	●	-	●	●	●	●	●		
7	Brass telescopic spray wand 57 - 100 cm	This highly robust telescopic spray wand made from brass can be continuously extended up to 100 cm and locked in any position. It can be put to flexible use in any challenging or commercial application, to enable an extended reach or to treat ground level areas. Also recommended for working with spray booms or drift guards. The telescopic spray wand is supplied complete with union nut for attachment to the SOLO manual valve.	49478		-	●	-	●	●	●	●	●		
8	Brass tree spray wand, 150 cm	The long tree spray wand is ideally suited to all challenging applications that require a robust, rigid wand with an extended reach. We also recommend it for treating very tall plants, e.g. for spraying espaliered trees or bushes. The brass tube consists of two 75 cm threaded spray wands with an 8 mm diameter, including two union nuts and seals for attachment.	49528		-	●	-	●	●	●	●	●		
9	Carbon tree spray wand 120 cm	The 120 cm long spray wand made from carbon fibre material weighs just 100 g. It can be used for all challenging applications that require rigid and extremely lightweight wands – even with an extended reach. Thanks to its very low weight, it protects the joints and is suitable for longer working periods. Supplied complete with union nut for attachment to the SOLO manual valve.	49449		-	●	-	●	●	●	●	●		
10	Carbon telescopic spray wand 60 - 120 cm	The 60-120 cm long telescopic spray wand made from ultra-light carbon fibre material weighs just 95 g. We recommend this version for all challenging applications that require a rigid and extremely lightweight wand with adjustable reach. It is also recommended for working with accessories such as spray booms or drift guards. Long working periods with minimal strain on the wrists are no problem. The standard delivery includes the union nut for attachment to the SOLO manual valve.	49457		-	●	-	●	●	●	●	●		

Pos.	Designation	Description and recommended application	Part no.		403 404	408 409 453	401 402	461 462	456 457 456 PRO 458	425 435	473 D 475	416 Li 417
11	Carbon telescopic spray wand 120 - 230 cm	The telescopic spray wand made from ultra-light carbon fibre material weighs just 160 g and is continuously adjustable in length from 120 - 230 cm . It can be used for all challenging applications that require rigid and extremely lightweight wands with a very long reach . The low weight greatly facilitates the work and protects the joints, enabling long periods of use . Supplied complete with union nut for attachment to the SOLO manual valve.	49445		-	●	-	●	●	●	●	●
12	Flexible spray wand extension 15 cm	Flexible and ideally suitable for treating inaccessible areas and places that are not easily visible or are difficult to reach , including use in pest control, for example. With the pliable spray wand section that can be bent by up to 180°, the jet can be sprayed in any direction . Including connection nut for fastening to an existing spray wand end piece, without nozzles. Can be combined with all SOLO spray wands and spray nozzles; the union nut for attachment is included.	49450		-	●	-	●	●	●	●	●
13	Flexible double spray head 60 cm	The double spray head has many possible applications, e.g. for treating a plant or row of plants from two sides at once, or for spraying two rows at the same time . With its twin nozzles, it can be used for treating single plants and to apply repellent spray to protect against browsing animals . With its two flexible spray wands, the double spray head has a total operating width of 60 cm. It comes complete with nuts to connect to each spray wand, prefitted hollow cone spray nozzles and two further sizes of hollow cone nozzle. Other types of nozzle in different sizes can also be fitted if preferred.	49411		-	●	-	●	●	●	●	●
14	Spray boom 60 cm	The 60 cm wide spray boom has two prefitted flat spray nozzles and is ideal for treating two rows or spraying large areas . Made from special, almost unbreakable plastic, supplied with two ball valve nozzle filters to prevent dripping and a union nut for attachment to an existing spray wand. We recommend combining it with the SOLO short, rigid, brass or carbon fibre spray wands .	49514		-	●	-	●	●	●	●	●
15	Aluminium spray boom 120 cm	For treating larger areas , we recommend twice the spraying width with the 120 cm wide, light, aluminium spray boom. Four flat spray nozzles and four ball valve nozzle filters to prevent dripping are prefitted . It can be ideally combined with the SOLO short, rigid, brass or carbon fibre spray wands. The union nut for attachment to the spray wand is provided.	49299		-	●	-	●	●	●	●	●

Nozzles and drift guards for pressure and backpack sprayers

	● Recommended	● Suitable	● Not recommended	-	Unsuitable / does not fit							
Pos.	Designation	Description and recommended application	Part no.		403 404	408 409 453	401 402	461 462	456 457 456 PRO 458	425 435	473 D 475	416 Li 417
1	Full nozzle set 	Universal nozzle set for all the most important application areas. The set contains a total of nine different, high grade flat spray, deflector and hollow cone nozzles. Four flat spray nozzles for treating large areas and spraying rows. With a ribbon-like spray pattern in sizes 015, 02, 03 and 04. Two deflector nozzles especially for applying herbicides: for treating large areas and working in the low pressure range with a coarse droplet size and ribbon-like spray pattern. The nozzles come in sizes DT 1.0 and DT 2.5. Three hollow cone nozzles for treating single plants, shrubs and large scale plantings that extend in all directions, especially for insecticides and fungicides. The three matching nozzle caps have hole sizes 1.0, 1.4 and 1.8 mm in combination with the required swirl plate. The nozzle set includes a nozzle retainer with prefitted flat spray nozzle.	49574		-	●	-	●	●	●	●	●
2	Universal plastic nozzle, adjustable 	The universal hollow cone nozzle made from plastic is especially suitable when treating single plants . It can be adjusted from fine droplets with a hollow cone-shaped spray pattern, right through to a point jet.	49525		-	●	-	●	●	●	●	●
3	Universal brass nozzle, adjustable 	The universal hollow cone nozzle made from brass is especially suitable when treating single plants that extend in all directions . It can be variably adjusted from fine droplets right through to a point jet.	49206		-	●	-	●	●	●	●	●
4	Oval drift guard 30 x 11.5 cm 	The oval plastic drift guard should be used for applying herbicide over larger areas and for precision spraying in edge areas . The drift guard helps prevent fine droplets unintentionally drifting into adjacent areas containing crops or bodies of water . It is equipped with a flat spray nozzle for a ribbon-like spray pattern and is effectively limited at the sides by the umbrella shape. The transparent design of the guard section has been redesigned to give users optimum visibility of the area to be treated whilst working. We recommend combining it with a 75 cm brass spray wand or short telescopic spray wands.	49430		-	●	-	●	●	●	●	●
5	Round drift guard Ø 15 cm  NEW!	We recommend the round drift guard with UV light protection for targeted, accurate herbicide application and for use on various smaller plots . Its prefitted full cone nozzle ensures a circular spray pattern . The guard effectively restricts the spraying range to help prevent fine droplets unintentionally drifting into adjacent areas containing crops or bodies of water . The round drift guard is also made from transparent, durable plastic for optimum visibility of the area to be treated.	49580		-	●	-	●	●	●	●	●

					403 404	408 409 453	401 402	461 462	456 457 456 PRO 458	425 435	473 D 475	416 Li 417
6	Dual nozzle with nozzle set	With its two pivoting nozzle retainers , the dual nozzle is suitable for a diverse range of applications . In conjunction with telescopic or extension wands, it enables users to treat two rows of plants at once or spray at an angle , e.g. to treat the underside of leaves or to reach awkward places . Each of the nozzle retainers can be pivoted through approx. 270°. The standard delivery includes two prefitted hollow cone nozzles for large scale plantings and two flat spray nozzles for treating large areas . The set also contains dummy plugs to allow one nozzle to be closed off . Using the knurled screw, the dual nozzle can be attached to existing spray wands without the need for tools.	49477		-	●	-	●	●	●	●	●

Other accessories

	Recommended			Suitable			Not recommended			-	Unsuitable / does not fit			
Pos.	Designation	Description and recommended application	Part no.		403 404	408 409 453	401 402	461 462	456 457 456 PRO 458	425 435	473 D 475	416 Li 417		
1	Manual valve set	Professional manual valve. Robust, ergonomic design made from special plastic. With childproof lock and connection for installing a pressure gauge (optional). Including all parts necessary for installation.	49440		-		-							
2	Pressure gauge	We recommend the professional pressure gauge for highly accurate measurements and readings, used with permanent spray pressure control. The easily readable display range goes from 0 to 6 bar (0-90 psi) in 0.2 bar increments. To protect the pressure gauge against impact and ensure safe handling, it is equipped with a large, removable rubber cover with profile. The standard delivery includes union nuts and seal rings.	49356		-		-							
3	Ball valve filter	To prevent dripping after the manual valve has been shut off, we recommend using the ball valve filter with stainless steel filter insert – especially when telescopic spray wands are used. Straightforward insertion below the spray nozzle, instead of the standard filter. Standard equipment level for SOLO spray booms 49514 and 49299. Opening pressure 0.3 bar. Mesh size 50 mesh, ISO-compliant.	49539		-		-							
4	Pro backpack carrying system	The comfortable, professional backpack carrying system makes safe and tireless working with SOLO backpack sprayers even easier over longer operating periods. Developed with the help of experts from the outdoor sports sector, it offers maximum user comfort thanks to the balanced distribution of weight over the shoulders and hips. High quality materials, wide straps with comfortable padding and ventilation of the shoulder straps and integral hip belt ensure perfect wearing comfort, akin to that of a modern hiking rucksack. The carrying system fits all SOLO backpack sprayers with 12 litre and 15 litre tank volumes (including older models) and is part of the standard equipment level for the latest SOLO PRO backpack sprayer models.	49599		-	-	-	-	-			-		
5	Compressed air connection valve NEW!	Automatic, rapid build-up of pressure saves you having to pump manually. Allows a large pressurised cushion of air to build up quickly and easily for longer working periods whilst maintaining a professional spray pattern. The pivoting compressed air connection valve enables an external compressed air supply to be connected to the sprayer and has an integral, automatic overpressure valve. It fits SOLO pressure sprayer models 456, 457 and 458.	49590		-	-	-	-		-	-	-		
-	Charging cable	Charging cable for external charging of the batteries from SOLO battery-operated backpack sprayer models 416 Li and 417, e.g. if a second battery is used.	49789		-	-	-	-	-	-	-			

Accessories for power backpack sprayers

●	Recommended	●	Suitable	●	Not recommended	-	Unsuitable / does not fit
Pos.	Designation	Description	Part no.		433	434	
1	Extension wand, 120 cm stainless steel	We recommend the 120 cm extension wand made from stainless steel for all applications that require a considerably extended reach, e.g. for very tall espaliered trees . To ensure safe handling, it is equipped with an easy grip plastic sleeve and can be simply attached to the existing manual valve. Can also be used in combination with the standard stainless steel spray wand from the SOLO range of high pressure sprayers.	49183		●	●	
2	Spray wand, 120 cm with shut-off tap and stainless steel changeover nozzle	This universal spray wand made from stainless steel has a particularly robust design and is suitable for all professional assignments that require an extended reach . We also recommend this wand for high precision spraying and single plant treatment, e.g. spraying trees in orchards and horticultural applications . Straightforward exchange of standard spray wand and manual valve . Flow rate, spray pattern and reach can be adjusted using the rotating selector at the handheld end of the spray wand: turning the selector changes the spray pattern from the initial broad hollow cone with a short reach and fine droplets, to a narrow full cone and then to a full jet with a greater reach . Including handle and two changeover nozzles in different sizes. At a higher pressure, the spray wand can also be used for cleaning purposes in agricultural applications .	49185		●	●	
3	Telescopic extension wand, 120 - 240 cm Stainless steel	We recommend the telescopic spray wand made from stainless steel for all applications that require a considerably extended reach, e.g. for very tall, lignified plants . The length can be variably adjusted between 120 and 240 cm and is locked using the large fixing nut made from stainless steel. A plastic sleeve ensures safe handling . Simple to attach to the existing manual valve.	49189		●	●	
4	Spray boom with 4 nozzles Stainless steel	The sturdy, stainless steel spray boom is suitable for treating larger areas or rows of plants . Four prefitted nozzles, one 75 cm stainless steel spray wand and the wing nuts for attachment to the existing manual valve are provided.	49300		●	●	
5	Twin nozzle Stainless steel	The twin nozzle is suitable for universal use and is part of the standard delivery of the SOLO 433 and 434 backpack power sprayers. The nozzle retainer is made from robust plastic; the two individual prefitted nozzles are stainless steel. Nozzle filters prevent blockages .	49182		●	●	
6	Extension hose 10 m with retaining bracket	Recommended for all spraying applications that require a greater working radius – even when working at moderate heights where the power sprayer itself has to remain on the ground . A bonus for comfort and safety . The robust, high pressure extension hose is 10 m long. The retaining bracket fits the filling aperture of the SOLO 433 model and can be neatly rolled up and stored together with the appliance .	49191		●	●	

Accessories for power misters

●	Recommended	●	Suitable	●	Not recommended	-	Unsuitable / does not fit
Pos.	Designation	Description	Part no.		423	451	
1	Dusting attachment	The dusting attachment allows the SOLO Port 423 mister to be transformed into a dusting machine. This makes it possible to apply plant protection medium in granulate or powder form. The standard delivery includes all of the necessary parts, such as the corrugated supply hose, ventilation manifold, anti-static wire (prefitted) and elbow with dusting metering lever.	49233		●	-	
2	ULV nozzle with metering device	The ULV nozzle with metering device for the SOLO Port 423 and SOLO 451 misters enables conversion to misting using the ULV (ultra-low volume) procedure, i.e. applying very high concentrations of spray liquid in extremely small quantities and small droplets. All the necessary parts, such as a special nozzle, hoses made from special plastic and the metering device are included.	49479		●	●	
3	Twin nozzle	With the aid of the twin nozzle, the spray pattern of SOLO misters can be split and enlarged. The amount of spray liquid supplied can be regulated at each nozzle separately. The angle between the two misting nozzles can be adjusted from 0° to 90° without using tools, i.e. the spray pattern can be altered from parallel to 90° even during misting. This makes it suitable for very versatile applications, from enlarging the spray to completely separating it to be able to spray in two different directions, for example when treating two rows at the same time. The removable broad spray attachments enlarge the jets, which can be beneficial when treating narrow rows within a planting, for example.	49137		●	●	
4	Extension wand	Using the 60 cm extension wand, the spray can be aimed more accurately as well as extended, which is helpful when spraying targets some distance away. The use of a SOLO liquid booster pump (accessory) is highly recommended in conjunction with the extension wand, in order to ensure a reliable supply of spray liquid even when spraying vertically.	49333		●	●	
5	Liquid booster pump	We recommend using the liquid booster pump when working with SOLO misters in plantings that predominantly require an upward spray direction or a greater reach. It enables a reliable supply of spray liquid especially when spraying vertically and using extension wand 49333.	49117		●	-	
			49235		-	●	

Engine oils, special maintenance oil and accessories

●	Recommended	●	Suitable	●	Not recommended	-	Unsuitable / does not fit				
	Designation	Description			Part no.		433	434	423	451	467
1	SOLO Profi 2T engine oil 100 ml (for 5 litres of two-stroke fuel mixture)	Semi-synthetic universal engine oil with fuel stabiliser. Contains cleaning and corrosion-inhibiting additives. Suitable for mixture lubrication and separate lubrication of all air and water-cooled two-stroke engines. The dissolving agents it contains ensure automatic and even mixing with the fuel. - Prevents the fuel mixture ageing - Enables trouble-free engine start even after standing for long periods - Protects against corrosion - Keeps the fuel system clean - Excellent ignition capability 2 years; even longer for high grade fuel Specifications: JASO FD, ISO-L-EGD, API TC, GLOBAL GD Mixing ratio 1:50 (observe instructions from appliance manufacturer)			49103		-	●	●	●	●
2	SOLO Profi 2T engine oil 1 litre (for 50 litres of two-stroke fuel mixture)				49104		-	●	●	●	●
3	SOLO Profi 2T engine oil, metering bottle, 1 litre (for 50 litres of two-stroke fuel mixture – easy to meter)				49105		-	●	●	●	●
4	Mixing container 1 litre	Practical, compact mixing container for topping up fuel without spills or drips, and practical mixing of 2-stroke fuel mixture (petrol/oil). Including funnel and measuring cap. The funnel makes it easier to fill the tank, even in the case of narrow filler necks. Hard to lose : when not in use, the funnel can be inserted into the mixing container and held in place with the screw cap. The cap can also help to achieve an accurate ratio for 2-stroke fuel: 1 cap full of two-stroke oil to 1 litre of petrol results in a mixing ratio of 1:50.			49278		-	●	●	●	●
5	Plant protection sprayer cleaning agent, metering bottle, 500 ml	Regularly cleaning your SOLO plant protection sprayers helps to keep them in good working order for a long time to come. For this, use our special cleaning agent concentrate to safely and reliably remove spray liquid residues and other contaminants from plant protection sprayers, as well as accessories and appliance components, such as nozzles and filters . It is also practical for cleaning hard to reach areas inside tanks and containers. Depending on the water hardness, a solution of 0.5 % to 1 % in water is sufficient. The cleaning agent is easy to use thanks to the practical metering bottle: simply squeeze the bottle gently to fill the metering chamber with 10 to 25 ml of cleaning concentrate, then mix into 1 to 5 litres of water. Can also be used for external cleaning tasks.			49600		Suitable for all SOLO plant protection sprayers				

German quality worldwide

SOLO Kleinmotoren GmbH was founded in Stuttgart in 1948 and to this day is still a leading global manufacturer of high grade sprayers and misters, blowers and cut-off machines – all featuring the high German quality standards you have come to expect from us.

In addition to our head office in the south German town of Sindelfingen, we have partners and subsidiaries around the world, ensuring we meet our customers' requirements. Quality and proximity to customers are the reasons why SOLO products are used in almost every country in the world.

Are you looking for sprayers or foam sprayers specially designed for cleaning? Request our new **CLEANLine** brochure and ask your local SOLO partner.

We are happy to advise you:
